

# TRAFFIC MANAGEMENT SYSTEM

- 
- Introduction to Traffic Management System
  - Components of Traffic Management System
  - Traffic Surveillance
  - Traffic Signal Control
  - Incident Management
  - Traveler Information Systems
  - Conclusion

# Introduction to Traffic Management System

- Definition of Traffic Management System
- Importance of Traffic Management System
- Goals and objectives of Traffic Management System
- Overview of the presentation

# Components of Traffic Management System

- Traffic Surveillance
- Traffic Signal Control
- Incident Management
- Traveler Information Systems

# Traffic Surveillance

- Definition and purpose of Traffic Surveillance
- Types of Traffic Surveillance technologies
- Data collection and analysis
- Benefits and challenges of Traffic Surveillance

# Traffic Signal Control

- Role of Traffic Signal Control in Traffic Management
- Types of Traffic Signal Control systems
- Adaptive Traffic Signal Control
- Benefits and challenges of Traffic Signal Control

# Incident Management

- Definition and importance of Incident Management
- Incident detection and response
- Coordination with emergency services
- Benefits and challenges of Incident Management

THANKING YOU!!!
